

sellify customer testimonials

The customized software for dtms.

• • • • •

dtms is a customer of the first hour and significantly involved in the success of sellify. The existing CRM system of dtms was extensively adapted to the individual requirements and processes by business//acts as a service provider over many years. After the cooperation between the manufacturer of this CRM system and business//acts ended, our customer of dtms did not want to find a new system administrator and partner for the customizing of this system, they wanted directly a new CRM system: sellify!

"business//acts convinced us with their straightforward and solution-oriented attitude."

For our customers at dtms, it was important to continue using a CRM system that can be adapted to individual needs in a cost-effective and releasable manner. The examined CRM solutions on the market could not offer this. At the time of the decision, business//acts and dtms had already been working together for 10 years. Thereby a good understanding for the processes of dtms developed.

"We consider it a success that we introduced sellify."

The great trust on both sides and the deep insights over the years into the technical platform for sellify made the decision easy. With sellify, dtms can exactly cover all requirements due to extensively implemented customizations. Furthermore, due to the agility of sellify, it is possible to continuously react to the constantly growing requirements and changing processes. The technically and professionally smooth implementation of this system is also a significant advantage for our customers of dtms.
