

sellify customer testimonials

sellify
Nichts leichter als das.

"The uptake of sellify, and therefore the data quality, has been tremendous."

.....

Thanks to the good cooperation during and especially after the implementation as well as the immediate assistance of our support, the system is well prepared for today's and also future requirements.

sellify in IT security.
secunet about sellify.

secunet plays it safe!

.....

secunet wanted a flexible solution that would cover not only everyday business processes but also the sales department's need for system-supported work.

"business//acts understands our business model. Discussions at eye level were possible at all times."

After the previous system software no longer met the high requirements, secunet now has a solution with sellify that is not only very performant, but also convincing in terms of price across the board. Since sellify is in the hands of the manufacturer and thus supports customizing, even short-term changes can be implemented quickly and flexibly. The cooperation during the implementation phase and beyond ran and continues to run smoothly; the technical support is particularly noteworthy here.

"The details show that thought went into the design."

During the development of the sellify solution, we reacted flexibly to spontaneous ideas. OnTour makes it possible to work with poor or completely without a network connection. "product world" from the ERP system was well integrated into sellify and - enriched with additional information - is also available to every user offline.
