

Track the progress of your sales pipeline with the new "Opportunity Review" feature keep an even closer eye on it!

As of version 21.5.0, you have full control over the development process of your sales opportunities. For this purpose, the new "Review" criterion is available in the "Opportunities" tab of the Find function. Based on a filter result list, you can see within seconds how these opportunities have changed on a key date you have selected.

Changes to opportunities can be recognized at first glance by highlighting them in color.
