Changelog 21.6.0

Batch processing for selected records

Batch processing

Save time and steps!

Via a new function group in the context menu, batch editing can be performed for any number of records, including, for example, adjustments to project and organization assignments or activity and document types as well as statuses for selected records.

The screenshot displays the sellify (OnTour) web application interface. The top navigation bar includes tabs for 'Allgemein', 'Profil', 'Bemerkung', 'Netzwerkpartner', 'Details', 'Status', and 'Präzisionen'. The main content area shows details for a company named 'sellify', including contact information and financial data. A 'Kalender' widget is visible on the right side. The bottom section features a table with columns for 'Personen', 'Bezahlungen', 'Aktivitäten', 'Dokumente', 'Chancen', 'Projekte', 'Selektionen', 'Historie', 'Ausgangsberechnungen', 'Eingangsberechnungen', and 'Lizenzen'. A context menu is open over the table, listing various actions such as 'Stapelbearbeitung', 'Übernehmen...', 'Delegieren...', 'Drucken', 'Selektion', 'Nicht Abrechnen', 'Abrechnen', 'In Abrechnungsbereiche unterdrücken', 'Nicht in Abrechnungsbereiche unterdrücken', 'Alle Erfolgt', 'Alle nicht stattgefunden', 'Alle Unerfolgt', and 'Löschen'. A sub-menu for 'Stapelbearbeitung' is also visible, containing options like 'Typ ändern', 'Organisation ändern', 'Person ändern', 'Hauptprojekt ändern', 'Weiteres Projekt hinzufügen', 'Hauptchance ändern', and 'Weitere Chance hinzufügen'.
