

sellify system requirements

Server-side requirements

Component	Minimum	Recommended
CPU	Intel i3 1.6GHz or equivalent processors	Intel i5 3GHz or equivalent processors
RAM (available)	6GB	16GB
Supported terminal servers	Microsoft Remote Desktop	
Required hard disk space for programmes	2GB	10GB
Required hard disk space for documents	10GB	Depending on size and number of customer's document stock (recommended 2TB)
Operating system	Windows Server 2008 (R2) / 2012 (R2) / 2016	
Database	Microsoft SQL Server 2012 / 2014 / 2016 / 2017	
Network	TCP/IP Port 1433 must be opened on the server.	
Support	Remote access via internet is required for maintenance (no permanent access required).	
Test system	A second server is needed as a test environment (can also be a virtual machine).	
Software platform	Microsoft .NET Framework 4.6	
E-mail	An outlook version as of 2010 or higher is necessary for the sellify outlook-integration

sellify system requirements

Client-side requirements (workstations)

Component	Minimum	Recommended
CPU	Intel i3 1,6GHz or equivalent processors	Intel i5 3GHz or equivalent processors
RAM (available)	2GB	4GB
Main memory on terminal server	2GB per user	4GB per user
Required hard disk space for sellify	1GB	
Required hard disk space for documents	20GB	Depending on size and number of customer's documents
Screen resolution	WXVGA (1280x800)	Full HD (1920x1080)
Network	TCP/IP with a latency of less than 5ms	
Minimum bandwidth	150kB/sec. per user	
Access to sellify documents directory	As a network drive or server share with write/read permissions	
Operating system	Windows 7 SP1 (x64) Windows 8 (x64) Windows 8.1 (x64) Windows 10 (x64)	
Software	Microsoft Office and Microsoft Outlook 2010 / 2013 / 2016 / 2019	
Multiscreen support	Yes	
Touch support	No	
Software platform	Microsoft.NET Framework 4.6

sellify system requirements

sellify//onTour – Server-side requirements

Component	Minimum	Recommended
Server	Runs on database server	
CPU	Intel i3 1,6GHz or equivalent processors	Intel i5 3GHz or equivalent processors
RAM (available)	6GB	16GB
Required hard disk space for programmers	1GB	
Database server	Microsoft SQL Server 2012 / 2014 / 2016 / 2017	
Database	Uses sellify database	
Required hard disk space for database deployment	3x current database size	
Installed features on database	SQL Server Data Tools Integration Services Client Tools Backwards Compatibility Management Tools - Complete SQL Client Connectivity SDK	
Network	TCP/IP Port 1433 must be opened on the server. TCP/IP Port 4711 must be opened on the server. (Port 4711 serves as standard port for onTour, can be modified.)	
Operating system	Windows Server 2008 (R2) / 2012 (R2) / 2016	
Software platform	Microsoft .NET Framework 4.6 Microsoft Internet Information Services 8 (complete installation) Microsoft Web Deploy Kit 3.5

sellify system requirements

sellify//onTour – Client-side requirements (workstations)

Component	Minimum	Recommended
CPU	Intel i3 1,6GHz or equivalent processors	Intel i5 3GHz or equivalent processors
RAM (available)	2GB	4GB
Required hard disk space for sellify//onTour	2x the current database size plus the size of the document archive	
Network	TCP/IP connection from port 1433 to database server Data synchronization with port 4711 (Port 4711 serves as standard port for onTour, can be modified.)	
Access to sellify documents directory	As a network drive or server share with write/read permissions	
Operating system	Windows 7 SP1 (x64; up to SQL-Server 2014 only) Windows 8 (x64) Windows 8.1 (x64) Windows 10 (x64)	
Database server	Microsoft SQL Server Express version matching the version on main server	
Software platform	.NET Framework 4.6
